

XL Series Narrow Web Treaters

If you are looking for XL-lence in narrow web corona treatment -- look no further. Enercon's new XL Series narrow web corona treating system combines the best features of our proven TL Series treater with some remarkable improvements:

SMALLER BY DESIGN:

Saves considerable space to fit virtually all narrow web presses. Total cubic size has been reduced 20%.

Model No.	"A" Dimension	Treat Width
XL11PV-100/10	16" (41 cm)	10" (25 cm)
XL11PV-100/14	20" (51 cm)	14" (36 cm)
XL11PV-100/18	24" (61 cm)	18" (46 cm)

FAST THREAD-UP

Counter-balanced gas spring makes set-up and routine maintenance easy.

EASY MAINTENANCE:

Unique hinged and slip-off electrode cartridges are easily removed making station cleaning and maintenance a breeze. No tools, disassembly, realignment or air gap adjustment required.

OZONE REMOVAL:

Ducting for ozone exhaust has been relocated to preserve prime operator work space while insuring an ozone safe work area. Optional ozone destruct unit available.

POWER SUPPLY IN A DRAWER:

The power supply is built right into the station. This eliminates the need to locate, mount and wire the power supply in a remote location.

INCREASED TREATING POWER:

A unique new system design allows stations with only one electrode assembly to do the job that previously required two, resulting in an overall design that delivers 40+% more treat power while requiring 20% less space for positioning and mounting.

OPTIONAL WATT DENSITY CONTROL:

Set a precise treatment level in seconds for automatic, consistent treatment control.
 (8 1/2"H x 10 1/4"W x 4 1/4"D)
 (22 cm H x 26 cm W x 11 cm D)

COMPLETE ELECTRICAL SAFETY:

Electrical interlock has been added to indicate "out of position" electrode, increasing operator safety.

REMOTE CONTROL:

All operator controls are contained in a separate control panel which can be located for operator convenience.
 (4 3/8"H x 12 3/8"W x 3 1/2"D)
 (11 cm H x 31 cm W x 9 cm D)

The new XL narrow web corona treating system from Enercon represents a great leap forward. Designed for high powered performance with user friendliness in mind, priced right, and easy to install, the new XL treating system from Enercon is today's best choice for narrow web converters.
